

Research for New Methods of  
Eliciting Producer Attitudes  
Toward Agro-climatic Changes  
in the Pacific Northwest

Kelsey Burkum

# Larger Project

- REACCH Objective 4
  - Goal to collect information
  - My contribution

# Research Thesis

My research will collect background information about experimental and behavioral economics in order to propose an application and process appropriate for collecting information needed by the REACCH project.

# Visual Representation

# Objectives

- Collect information about the theory and application of experimental and behavioral economics.
- Propose an application and process appropriate for collecting information needed by the REACCH project.
  - AgTools

# Proposed Application and Process

- Individual survey in groups across regions
- Comprehensive demographic data
- Adjusted management schedule
- Introduce climate change related scenario
  - Scenario options

# Conclusions

- Research implications
- Limitations
- Potential ethical implications

# What I Learned

- The use of experimental and behavioral economics is increasing
- Skills learned in research and process
- Other skills learned

# Special Thanks

- Advisor: Penelope Diebel
- Laurie Houston
- Susan Capalbo
- Stacy Hatfield
